

MyVision - ScreenPop

See who is calling before you answer

NEC MyVision is a brand new application from NEC to replace the previous screenpop.

Simply described, MyVision links your computer with your telephone system in order to deliver many different business benefits. The automation of call handling, 'Hot Key' dialing and being able to pop up your callers contact details before you answer the call.

Developed in the latest 'net' technology, the design is modular. This means that if anything changes, we simply replace a redundant module with a new one. This is particularly important as the application suite is future proofed and new database drivers can be added to the suite. Therefore, in theory, there is nothing we cannot pop!

Works out of the box

NEC MyVison provides your business with six ready to go databases.

- Microsoft Outlook v2000 or higher
- Microsoft Access v2000 or higher
- Microsoft CRM v1.2 and 3.0
- Goldmine v6.5 or higher
- ACT! V6.0 and v8.0
- Lotus Notes v6.5

Other databases?

If you come across a modern database package that you want to pop, but we have not yet written a driver chances are that we can join the developer program and have a driver written for you. This of course will be reflected in the one off database driver charge. If the database is old or bespoke, you may have to provide information that is more detailed

The screenshot shows a web-based contact form titled "John Ahern - Contact". The form includes the following fields and values:

- Full Name:** John Ahern
- Job title:** (empty)
- Company:** ABC Supplies Ltd
- File as:** Ahern, John
- Phone numbers:**
 - Business: +44 (01234) 567890
 - Home: (empty)
 - Business Fax: (empty)
 - Mobile: +44 (07771) 987654
- Addresses:**
 - Business: (empty)
 - This is the mailing address
- E-mail:** jahern@abcsupplies.com
- Display as:** John Ahern (jahern@abcsupplies.com)
- Web page address:** (empty)
- IM address:** (empty)

Easy to Install

The NEC MyVision application works with Windows XP and Windows 2000 and has been designed for easy installation.

There are a number of components, which include the licensing server, a database driver and an intelligent client application. All you have to do is decide whether the library sits centrally on the server or it is installed on each PC. After that, a simple wizard will have the whole thing set up for you in no time.

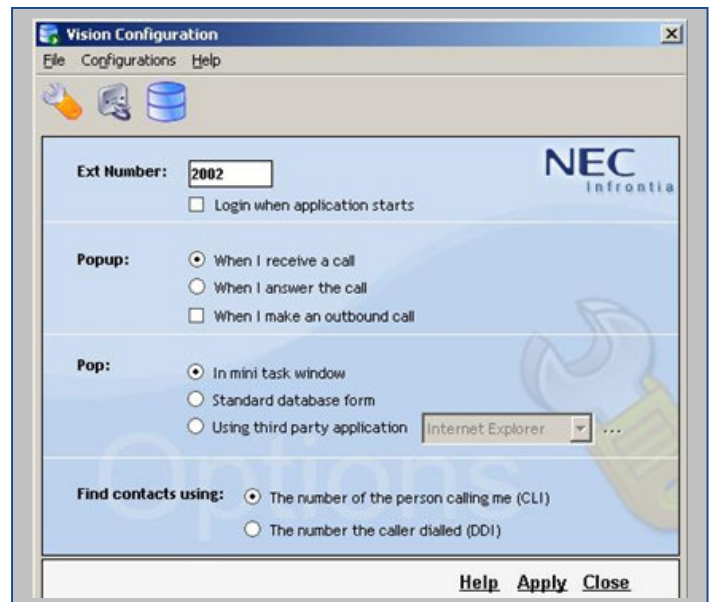

Features and Benefits

- Pops on CLI
- Pops on DDI
- Pops Behavior Configurable
- Integration to third party applications
- Easy to understand user interface
- Free of charge Outlook driver
- Pops in any format to integrate into third party CRM application
- Pops blank records when there is no match
- TAPI 2.1 compliant
- Mini Pop Up window
- Display on a single click
- Internal and External ringing
- Selectable fields for telephone numbers
- Single PC architecture for SME's
- Client Server architecture for Enterprise customers.

Server evaluation or full, its up to you!

All NEC Vision applications work for 30 days and we call this a pre-payment license. On the 31st day, the application ceases to function. Any time during the evaluation period a release key can be generated from a PC Registration code generated by the licensing server.

The key can only be generated once the application has been paid for.
